

XM radio truly is AWESOME! I VERY rarely lose a signal and can listen to all my favorite music (and some that I had never heard of before) commercial free anytime any day. Especially traveling it is comforting to be able to have such a variety available at anytime.

The talk stations are superb! Being from the Washington, DC area and traveling there with work on a regular basis, the traffic and weather stations are so detailed, I was even able to hear of airport delays in the area. The attention to detail that XM uses is far superior than regular FM.

Comparing XM radio and FM radio is like comparing a 400 channel satellite receiver, to a "bunny eared" TV that gets a few local stations.

XM is truly in a league of it's own.
